⬆ MIDway 2.8

Supported platforms: GSM (v60i, v66i, T280i, T720G); WCDMA (A820); CDMA 1.x (T720C); LCA (E380, V300, V500, V600 over USB)

Commands

File		**Open JAD**	Open JAD file. The file can be downloaded to the device until another one is opened or MIDway session is closed.
		Send JAD	Send JAD file to the device and start installation process.
		Stop Transmission	Stop JAD or JAR file transmission.
		Send AT Command	Send AT command to the device. Use this command once after each connection of serial cable to CDMA 1.X device.
		Settings…	Change MIDway connection settings.
		Recent Files [4]	Open recently accessed JAD files. Use these menu items for quick access to actively used MIDlet suites.
		Exit	Exit MIDway.
View		**Suite Info**	Show MIDlet sute information and JAD parsing errors.
		Download Status	Show status of the current/last MIDlet suite download.
		Debug Log	Show debug information received from the device (for the phones with serial debug output enabled only).
		Status Bar	Show or hide status bar.
Log		**Save Log As…**	Save debug information as a text file.
		Clear Log	Clear the debug information received.
Help		**About MIDway…**	Display MIDway's version info. Use this command to make sure that you are using the right version.

GSM and Talon	LCA	CDMA 1.x
Settings: **Com Port:** currently used for serial connection **Baud Rate:** see phone's SW release notes (19200 if not indicated) **AT command:** [EMPTY]	**Settings:** **Com Port:** currently used by USB Modem Driver (see PST help for more information on the driver) **Baud Rate:** see phone's SW release notes (19200 if not indicated) **AT command:** [EMPTY]	**Settings:** **Com Port:** currently used for serial connection **Baud Rate:** 19200 **AT command:** AT+MODE=20
Instructions: • **Launch Java AppLoader**, if serial cable is not connected *(Phone: Java Tools > Java AppLoader)*. • **Connect the serial cable.** • **Start MIDway.** • **Open JAD file** if it's not opened yet *(MIDway: File > Open JAD)*. • **Send the JAD file to the device** for installation *(MIDway: File > Send JAD)*.		Instructions: • **Start MIDway** if it's not running. • **Connect the serial cable.** • **Send the AT command to the *phone*** *(MIDway: File > Send AT Command)*. It will switch the device into MIDway mode. • **Open JAD file** if it's not opened yet *(MIDway: File > Open JAD)*. • **Send the JAD file to the device** for installation *(MIDway: File > Send JAD)*.
Notes: • MIDlet suite can not be downloaded if the 'Games and Apps' ('My JavaApps') application is active on the phone. • MIDway can not share serial port with other PC applications.
